

# Our Services

Harley Dykstra's range of services ensure your next land development or infrastructure project is completed to the highest quality, with the most accurate data and information possible.

## Surveying services:

Accurate data for land development, covering land, sky, and sea.

We use the latest technology in our surveying processes to ensure the most efficient and accurate data. Using the latest drone, hydrone, mobile mapping, scanning stations, and reality capture technology, we capture high-resolution aerial and land imagery and point cloud data to provide precise, efficient, and cost-effective solutions to your built-form and infrastructure projects.
